## and what have you

by BOB CRAIG

This week's newsletter from Omar Burleson is carried this week in this column since there is so much fuss going on about how to fight communism and his letter sheds some common sense light on this.

In recent weeks many people have written me asking what they, as citizens, could do to fight Communism. A number of these letters have been from school children and college students.

THE F. B. I. WAS CREATED IN 1908. Mr. J. Edgar Hoover has been its Director since 1924.

FROM THE BEGINNING TO THE PRESENT Mr. Hoover has fought subversive elements in our Nation. He has surrounded himself with men who are experts in all forms of subversion and un-American activities, whether Communists or something else.

WRITING IN THE APRIL ISSUE of the F. B. I. Law Enforcement Bulletin, Mr. Hoover had this to say:

"AMERICA, HISTORICALLY AN IMPREGNABLE fortress against tyranny, is engaged in a mortal struggle with the world communism. It is time for both citizens and governmental authorities to confront this threat in a calm, realistic, rational, law-abiding manner."

THE INGREDIENTS FOR COMMUNIST COUPS in nations which have fallen under its spell always include a populace shaken with fear, hysteria, and confusion. Above all, however, is the danger of irresponsible counteraction by citizens who lend impetus to communism through inept attempts to fight this insidious menace.

"THE LEADERS OF WORLDWIDE COMMUNISM proclaim that even America can succumb to the 'rules of revolution' conceived by Karl Marx and galvanized into the first successful communist revolution by V. I. Lenin."

"LENIN SAID, 'THE MORE POWERFUL ENEMY can be conquered only by exerting the utmost effort, and by necessarily, carefully, attentively and skillfully taking advantage of every, even the smallest, 'rift' among the enemies. . . ."

"THERE EXISTS TODAY IN OUR LAND a vital 'rift' which the communists are exploiting. Unfortunately, this involves certain people across the country who engage in reckless charges against one another. The label of 'communist' is too often indiscriminately attached to those whose views differ from the majority. Those whose lives are not led according to what one segment of society might decree to be the 'norm' are too frequently challenged as 'Red'."

ATTRIBUTING EVERY ADVERSITY TO COMMUNISM is not only irrational, but contributes to hysteria and fosters groundless fears. Communism is, indeed, our paramount adversary, and it leans on its credo of invincibility and a concept of historical inevitability to accomplish its ends. The way to fight it is to study it, understand it, and discover what can be done about it. This cannot be achieved by dawdling at the spring of knowledge; it can only be accomplished by dipping deeply into thoughtful, reliable, and authoritative sources of information.

"THE JOB OF CURTAILING AND CONTAINING COMMUNISM is one for legally constituted authorities with the steadfast cooperation of every loyal citizen. This is neither the time for inaction nor vigilante action. We must unite as a people, we must understand our basic American heritage under law, and we must face the communist menace with deliberation, quiet courage, and knowledge. These are the qualities which communism shrinks from—these are the qualities against which communism can never succeed."

## 40 Years Ago--

One of the many things needed in Hamlin is a better understanding and closer co-operation among the business men and citizens in general. Not for personal and selfish interests but for the upholding and progress of this little city and welfare and prosperity of the surrounding country.

It was for this end that a men met at the City Hall last number of interested business Friday night to "talk over" things. There were a good many ideas expressed and every one was enthusiastic concerning what can be done. Among the things mentioned there was not one that was beyond reach. Mr. Business Man if you were not out at that meeting you missed one of the best meetings that Hamlin has had in a long time.

A second meeting will be held at the City Hall again this Friday night. It is earnestly hoped that you will be there. Back in your brain box may be a bright idea that should be put to thinking along with the "other fellows," tell it in a few words and let's get busy without any foolishness. Don't get scared, no collection is contemplated. And don't get it into your "noggin"

THE HAMLIN HERALD

APRIL 20, 1961

AUSTON, TEX — Some-time between now and August 31, the Texas Legislature must come to a showdown, do-or-die, back-to-the-wall decision on a big new money-raising bill.

But lawmakers believe the situation will have to have reached the desperate, no-choice-left stage before such a decision can be made. To meet current needs, say some lawmakers, the tax bill will have to be a big one and it's bound to bring static from voters.

Only way they can survive, said one, is to be able to say, "Look, I don't like this bill either. But what can we do . . . close the schools?"

In this climate, the House postponed floor action on the general sales tax measure by Reps. John Allen of Longview and Forrest Harding of San Angelo. Gov. Price Daniel attacked the bill as "obnoxious and inequitable," hitting everything "from the cradle to the grave."

Governor Daniel urged compromise through a "package" bill. Ingredients for the package, he said, might be gotten from Rep. George Hinson's omnibus tax bill and Rep. Ben Atwell's selective sales tax measure.

Hinson's bill would hit in many areas -- watches, jewelry, power tools and machinery, construction materials, natural gas, restaurant meals, non-essential beverages, etc.

Atwell's bill is akin to a general sales tax except that it names hundreds of items it would tax rather than making a blanket provision.

SENATE COOL TO TAX — With less than bubbling enthusiasm, Senate State Affairs began hearings on the first tax bill sent over by the House.

It is Rep. Charles Ballman's "loophole bill" designed to raise some \$43,000,000 toward retiring an expected \$63,000,000 deficit in the general revenue fund.

Senators listened with seeming sympathy to witnesses who criticized the bill's provision for a revised franchise tax formula and a gift tax. They listened, too, to a lengthy pro-sales tax discussion by Tom Sealy of Midland, chairman of the Citizens for a Sales Tax group.

Under the Ballman bill's broad caption, the Senate could add extensively to its revenue-raising features, but most observers doubt the Senate will be eager to seize the initiative at this stage.

CAMPAIGN LIMIT KILLED — A bill to limit campaign expenditures to \$25,000 in a race for the U. S. Senate or Congressman at large was killed by the House, 83-to-50.

Sen. Martin Dies Jr. of Lufkin was sponsor of the bill which passed the Senate.

Supporters of the measure said that as things are "a rich man can buy his way into office." Opponents said the limit was unrealistic and that a newcomer to politics could never become known with such restrictions on a statewide race.

INSURANCE CHANGE FLOUNDERS — Sen. Grady Hazlewood's bill to set ground rules for the state's merit rating auto insurance has had at least a temporary set-back. Senate voted 16-to-13 to take up the bill. However, a two-thirds majority is needed to begin floor action.

Prior to this action, the State Board of Insurance announced extensive changes in the rating plan, effective August 1. Such violations as running a red light or stop sign, illegal passing or turning, negligent collision and breaking of drivers' license restrictions were removed from the list of actions causing a driver to pay higher insurance rates.

Senator Hazlewood was not satisfied with the changes. He criticized the removal of red light running from the list and the keeping of penalties for speeding, no matter how slight.

FREIGHT RATE BILL PASSED — A bill to simplify rate setting for railroads and truckers was passed on second reading by the House.

Under present law, the Railroad Commission has to pass on every rate change request, no matter how trivial. Under the proposed measure, the rail or truck line would publish the proposed new rate and if no one objected, it would go into effect. If there were objections, the Railroad Commis-

# NEINDA PHILOSOPHER WANTS TO BORROW MONEY IF HE CAN GET SAME TERMS ENGLAND IS GETTING

Editor's note: The Neinda Philosopher on his Johnson grass farm on Route 1 has caused a little comment, and we asked him for his picture, which we wish we hadn't done. But since he sent it along, we're publishing it with his second letter, which this week incidentally reveals a considerable ignorance of international finance.

Dear Editor:

I read in a copy of the Abilene Reporter News which I got in town Saturday because it was wapped around the shoes I had half-soleed where England some time ago negotiated a loan from the United States and the terms were so interesting to me I have been wondering why we can't have some banking like that here in Jones County.

As I understand it, the United States loaned Great Britain four hundred million dollars and won't no interest start until 1968 and when it does start it will be 2 per cent, with the provision that England can ignore the interest if her exports fall below sixty per cent of what they were immediately before the last war started.

## 28 Enter Stonewall 4H Electric Show

West Texas Utilities sponsored the 4th Annual Stonewall County Electric Show, Saturday, April 8th. Carl Barton of West Texas Utilities judged the Show. Ribbons were presented to everyone, with 4-H Jackets going to the winners of 1st and 2nd places.

The six winners were Billie Ann Vahlenkamp and Danny Letz, both of Old Glory, 3rd place overall winner was Tim Jones, 4th place winner was Sherry Barnett and 5th winner was David Patton, all of Aspermont.

Blue Ribbon Winners were: Tim Jones, Edward Patton, David Patton, Billie Ann Vahlenkamp, Sherry Barnett, Vickie Barnett, Danny Letz, Danny Moorhead, Shirley Hoggard, and Ricky Trammell, Red Ribbon winners were: Jimmy Prince, Jerry Kennedy, Ned Jones, John Rimes, Ronnie Dickerson, Ronnie Moorhead, Dianne Patton, Kenneth Parker, Perry Workman, Joe Cannon, Ann Cumbie, Shirley Hoggard, Joann Poore, and Nancy Feagan.

Now there's a system of banking which I admire and I would like to know why Banker Tate May and Banker Floyd Clifton don't get their banking principles up on the international level and really do some business.

If the bank will loan me money without any interest until 1968 and none then if my farm doesn't produce sixty per cent of what it did before the war, and I figure I can arrange to keep production down to that figure without any effort at all to speak of, there ain't no telling how far I could go or how much business the bank could do with me.

I understand the United States is making this loan because it is worried about England going under and the same thing would apply in my case. I could meet them terms satisfactorily. But it is my opinion England ain't in no serious danger as long as there are

Englishmen left smart enough to negotiate them kinds of loans.

If you know of any bank in this area dealing in international loans I will appreciate you letting me know as soon as possible and I hope to get there before the money's all gone.

Yours faithfully  
J. A.

a home in 1981

Kids just naturally grow up . . . and they do it fast. The kids the age of the little girl in our picture will be wanting a home in 1981. We hope she has a home (run by electricity, of course) in 1981 and that her home life is a happy one. We also hope she has something else as well — a strong, free nation — where she has a right to get ahead under her own steam and will always be secure!

Investor-owned companies, like West Texas Utilities Company, are working hard to see that this little girl's "wants" come true in 1981. Each year, WTU spends thousands of dollars and uses thousands of man-hours planning ahead to be sure we can supply the ever increasing demands for electric energy. In a private enterprise nation, this is our job! We are going to do a good job for our little girl.

## AT HOME TODAY

In our little girl's home today, she can enjoy electric living at a very economical cost. For instance — the average family, served by WTU, can cook a complete meal for less than 3¢ with a modern electric range. If you are not using an electric range, you owe it to your "little girl" to investigate this modern method of cooking today.

One of the most important effects of advertising is its influence on the quality of goods and services.

The relationship of quality to advertising can be observed in both manufacturing and retailing. The public, with good reason, bases its judgement of a product or a company on advertising.

We correctly assume that the company which advertises consistently is a stable company. The amount and quality of the advertising indicate that a company is in a position to back up its offers.

Advertising also shows the consumer that a firm has confidence in itself and the product it sells. The absence of advertising indicates a lack of confidence and stability.

In recent years the American consumer has become increasingly aware that quality is more important than price -- that low cost goods may not be cheap. Without this influence or advertising it often would be impossible for the consumer to obtain assurance

Low price would become the primary basis for buying, if it were not possible for retailers and producers to build and maintain public confidence. Inferior goods crowd quality products from the market when price alone governs buying.

But advertising which builds brands names and maintains the prestige of retail firms give the consumer assurance that a slightly higher price may be the sign of a real bargain.

**Why is the Ford Galaxie head and shoulders above all the imitators?**

'61 Ford Galaxie is available with the Ford 292 V-8 that won the low-price V-8 class in the Mobilgas Economy Run with 21.3 mpg!

**Because it's beautifully built to take care of itself!**

We're tickled to see so many other cars latching on to the styling trend started by Galaxie. But they can't copy that Thunderbird roofline—any more than they can match Galaxie's Thunderbird steering and handling.

What's more, Galaxie is the fine car built to cut your operating costs. For example, you can go 30,000 miles without a lubrication. And when you compare price, you find that Galaxie costs several hundred dollars less than some cars that give you less. Challenging statement? We're here to prove it—today.

## Family enjoys convenient living, more privacy with extension phones

By DON DAVIS, Telephone News Writer

"A phone in our bedroom is really convenient, because it's nice and quiet there, and I have complete privacy," says Jay Brandstetter, who spends a lot of time arranging club, civic activities by phone.

"My wall phone," says Mrs. Brandstetter, "is the handiest thing when I'm working in the kitchen. Bonnie Jay likes it, too, because it is low enough for her to reach easily."

Like many families nowadays, Jay and Lucille Brandstetter and their two daughters, Sharon and Bonnie Jay, are really on the go.

No doubt that's why they're quick to take advantage of today's modern conveniences—such as colorful extension telephones—that help them get more things done. The Brandstetters, for instance, have three phones in their seven-room house.

"I just don't see how we'd manage without extension phones," Mrs. Brandstetter says.

Why don't you enjoy the timesaving convenience, the privacy and the security of extension telephones? Just call the telephone business office or ask any telephone serviceman. Cost is low.

Ask about new Bell Chime. It announces your calls with a pleasant musical tone.

## REPORT FROM AUSTIN . . .

By REP. LEON THURMAN

After today's session of the Legislature, it leaves 46 days of the regular session in which to pass an Appropriation Bill, a Tax Bill and Legislative Redistricting. These are a few of the major items that are to be covered in the last 46 days. Of course, there will be many items that could be classified as minor.

We have received some mail on House Bill 777 by Berry, which is a follow up of H. J. R. 4; however, we do not think Mr. Berry will ever attempt to bring a horse racing bill to the floor of the House. We feel it will die in committee or be postponed.

One of the controversial bills voted on this session was H. B. 156 by Spears, which boils down to a fight between the truckers and the railroad. This bill passed by two votes. This bill will probably be on the calendar on Monday of next week and probably each one will get their gun loaded and be ready for us.

Another bill that failed to pass the House was a bill by Senator Dies limiting campaign expenditures for candidates for U. S. Senate to \$25,000.

The House did not take up on Monday H. B. 803 by Allen and Harding. The same was asked to be taken off the calendar by the authors, and it will probably be two or three weeks before this type of tax bill will be considered. H. B. 803 was a general sales tax covering everything; however, we understand there were five amendments that would take out food, fertilizer, and farm equipment, and others dealing with some of the selectives.

The Revenue and Taxation Committee has had hearings on other tax methods, but as yet, they have not passed any to the House. Probably we will have several varieties in the near future.

The committee on Legislative Redistricting has met with most of the West Texas dele-

## GRAIN GROWERS ARE URGED TO CHECK PROGRAM CAREFULLY

College Station — Grain producers should carefully weigh the advantages and disadvantages of the recently announced feed grain program and apply them to their own situations before making a decision on whether or not to participate. According to Texas Agricultural Extension Service economists, there is only one best way to make the determination — take a pencil and paper and do some figuring. Figure the gains and losses that might be expected to result from participation or non-participation in the program.

The economists point out the effect of the program on net farm income may depend on several factors. The farmer who participates may earn extra income from some of the following sources: payments for diverting corn or grain sorghum acreage into conservation uses; higher support prices for grain sold under the program and earnings from labor saved and put to other uses. In addition, there may be savings in out-of-pocket costs which would have been spent for producing and harvesting corn and grain sorghum from the diverted acres.

On the other hand, they say farmers going into the program should take into account such losses as the costs of plowing up corn or grain sorghum already planted; costs of maintaining acres diverted to conservation uses; costs of extra livestock feed which might have to be purchased to replace production from diverted acres or sold under the program and the reduced income from corn and or grain sorghum as a result of the reduced acreage.

The economists suggest that every grain farmer do some checking on the items listed and others which may apply to his particular farm to see how his earnings might be affected. The expected gains from participating in the program should be totaled along with losses in income that might occur. Simple subtraction will show the net gain or loss that can be expected. The economists point out that only costs and return items affected by the feed grain program should be considered and these may involve other items of the farm business besides the corn and or grain sorghum enterprises.

Another advantage which should be seriously considered, say the economists, is the in-

State revenue funds which support the public school program are derived from fifty different sources.

Insurance phase of the program. Participation in the program will insure income even though the corn or grain sorghum crop is a failure. There may also be savings in production credit needed because of the advance cash payments allowed under the program and future crop yields may be improved as a result of conservation practices carried out on the diverted acres.

Economists emphasize that no corn or grain sorghum grower should pass up an opportunity to get the facts on the program, and in turn, urge that the information gained be used in making a thorough analysis of their own situation.

Information on the feed grain program may be obtained from county Agricultural Stabilization and Conservation offices and local county agricultural agents. Also by attending meetings which are now being held or soon will be in most grain producing counties of the state.

## COUNTY AGENT GIVES HINTS ON NEW FEED GRAIN PROGRAM

The new feed grain program offers cooperating farmers opportunities to make good use of the acres they've diverted from feed grains, according to Jones County Agent, Kirby Clayton.

What are some possibilities for those "retired" acres? Clayton lists these conservation uses: Permanent type rotation cover of grasses and legumes; Temporary cover of grasses, legumes, or small grains; Water storage; Wildlife food or habitat plantings. Trees or shrubs; Cropland in protected natural cover or in volunteer summer fallow if county committee determines it is not practicable to establish cover. Clayton says that if the farmer plans to return the diverted land to feed and fiber crops in the future, he might

## 'THE SINS OF RACHEL CADE' COMING TO ROGUE SUNDAY

Primitive passions come into bitter conflict with civilization's moral codes in Warner Bros.' Technicolor production of "The Sins of Rachel Cade," starring Angie Dickinson, Peter Finch and Roger Moore, which opens Sunday at the Rogue Theatre.

Miss Dickinson, playing the title role, is seen as a beautiful woman in her mid-twenties who ought to be married to a good man and have lots of children. Instead, she is a spinster missionary in the Belgian Congo.

Her desperate struggle between God's work and the weakness of her own flesh—and the ultimate resolution of her emotional turmoil — provide the thematic material for the best-seller novel, based on the best-seller novel by Charles Mercer.

Scenarist Edward Anhalt has dealt with the sensitive and frequent delicate subject matter in straightforward fashion, approaching the young missionary's problems with candor and honesty.

The Rachel Cade that emerges from celluloid is a many-dimensional creature, one whose lofty ideals and indefatigable labors stamp her as a dedicated person ready to give her very life, if need be, for her work, yet at the same time a woman of human frailties and desires whose greatest battle is with her own conscience.

Indelible upon the story is the contribution of director Gordon Douglas and producer Henry Blanke who believe that Rachel Cade's weakness make her all the more understandable as a human being, all the more to be admired for her many sacrifices.

Seldom has a comparative new-comer to the screen been entrusted with the role being the depth and scope of the portrayal offered by bewitching lovely Angie Dickinson.

The combustible blonde became an overnight sensation in Hollywood following her spectacular appearance as Feather, the dancehall girl with a lurid past, in "Rio Bravo," in which she was leading lady for John Wayne.

Thereafter she was quickly put into cinematic harness anew when she was cast by Warners in "The Bramble Bush," with Richard Burton, Barbara Rush and Jack Carson. In this production, she is seen as a nurse who has two men in her life—Burton and Carson.

Few motion picture roles are as demanding as the Rachel Cade portrayal for which Angie is in all but a mere handful of the total of 180 sequences.
